CITRIX

CISCO

Citrix Application Delivery Controller (ADC) and Cisco Application Centric Infrastructure (ACI)

Delivering business agility through data center automation

Rapidly address business changes with a fully integrated Citrix ADC and Cisco ACI solution. Adapt to change easily with comprehensive policy-based management of L4-L7 services. Maintain uncompromised performance across multiple applications, even as demands fluctuate, through Citrix ADC services that work directly with ACI. Reduce administrative costs with centralized, policy-based management and automation for full-stack provisioning. Implement comprehensive security while ensuring compliance with industry standards using native ACI security in combination with Citrix ADC security services. Defend the business through a multi-layered, zero-trust, whitelist-based approach to security. Protect the user with a solution that combines policy-based management with SSL, VPN, application firewalls, and application-focused analytics with the visibility to uniquely qualify and see the experience of your users.

Citrix ADC and Cisco ACI–benefits of our joint solution

AGILE

- Rapidly address business changes with infrastructure management tools that enable application revisions with uncompromising integration between between Citrix ADC and Cisco ACI

- Deploy rapidly by easily propagating policies and services across physical, virtual, and container environments

- Adapt to change easily with comprehensive policy-based management of L4-L7 services

- Improve system reliability with monitoring services that intuitively present network health information to enable proactive network management

SCALABLE

- Maintain superior performance across multiple applications, even as demands fluctuate, through Citrix ADC services that work directly with Cisco ACI

- Optimize infrastructure assets by using multiple load-balancing techniques

- Enhance application performance using data caching techniques that lower the overhead associated with repeated content demands

- Reduce administrative costs with centralized, policy-based management and automation for full-stack provisioning

SECURE

- Implement comprehensive security while ensuring compliance with industry standards using native Cisco ACI security in combination with Citrix ADC security services

- Defend the business through a multi-layered, zero-trust, whitelist-based approach to security

- Protect the user with a solution that combines policy-based management with SSL, VPN, and application firewalls

- Maintain compliance through policy control, micro-segmentation, and multi-tenancy services that simplify management and administration

About Citrix

Citrix (NASDAQ:CTXS) aims to power a world where people, organizations and things are securely connected and accessible to make the extraordinary possible. We help customers reimagine the future of work by providing the most comprehensive secure digital workspace that unifies the apps, data and services people need to be productive, and simplifies IT's ability to adopt and manage complex cloud environments. With 2017 annual revenue of $2.82 billion, Citrix solutions are in use by more than 400,000 organizations including 99 percent of the Fortune 100 and 98 percent of the Fortune 500.
